**FOR IMMEDIATE RELEASE**

**MILWAUKEE-BASED INFOCOR LLC EARNS A PLACE ON  
MMAC'S 2009 TOP 50 FUTURE COMPANIES LIST**

MILWAUKEE (June 18, 2009) – The Metropolitan Milwaukee Association of Commerce today announced Milwaukee-based InfoCor LLC as one of their 2009 Future 50 companies.

The MMAC's small business arm, the Council of Small Business Executives (COSBE), has conducted the Future 50 program for the past 22 years. To be considered, companies must meet the criteria of having local headquarters (with the seven counties of southeast Wisconsin), independent ownership and strong growth in revenue and employment.

“Over the past two years our company has seen significant growth, and we believe this growth is primarily due from delivering value to our customers; by developing fundamental business relationships, understanding our customer's business and being the preferred supplier” said Cheryl Anderson, President & CEO of InfoCor. “Complimenting these actions has been our additional focus on organic and product partnership growth”.

To sustain this growth, InfoCor focuses on providing superior customer service and support, continuously improving customer-focused product and service offerings and partnering with clients and manufacturers to form rewarding relationships. The company's latest success has come with their new assistive technology product, satalight™. The product, which is designed to help adults and children with disabilities, has seen increasing sales across the nation, particularly in the K-12 education market. InfoCor anticipates gaining additional success with this product in Canada and also within the US government as a result of their recent presentation at the U.S. General Services Administration Assistive Technology Showcase in Washington D.C.

InfoCor LLC is a woman-owned national leader in the A/V systems design industry, integrating state-of-the-art presentation and conferencing facilities for commercial, educational, governmental and not-for-profit clients. For more information please visit <http://www.infocor.com/> or call (414) 979-0890, 1-800-896-9495.
