Milwaukee, Wisconsin---September 1, 2009---InfoCor announces an agreement and partnership to sell Copernicus Educational Products, Inc. newly released Royal Interactive-Rover mobile display stand for interactive whiteboards within the Educational K-12 and Corporate markets.

InfoCor, a premier Milwaukee, Wisconsin based audiovisual integrator and a leader in providing collaborative technology solutions, becomes the exclusive reseller of the Interactive-Rover for the states of Wisconsin, Minnesota and Northern Illinois. Copernicus Educational Products, Inc. is a leading manufacturer of educational products including Teaching Easels, Teaching Aids, Storage Solutions and the Arts. InfoCor and Copernicus are working together to be the premier supplier of the i-Rover mobile display stand across these states.

The Royal Interactive Rover delivers more capabilities to enable technology in the classroom. Fully mobile and compact, the i-Rover makes sharing between classrooms a perfect way to introduce interactive whiteboards to educators and students alike. The product offers quick set up time, one handed height adjustment, and with the integrated projector arm, offers minimized shadowing on the interactive whiteboard.

“Copernicus Educational Products, Inc. is committed to advancing learning and allowing access to technology in the classroom” says Jim Phillips, President. “By bringing together the expertise InfoCor has within the education market particularly in Wisconsin, it is clear to us that InfoCor shares our vision, and with the K-12 install base they share, this makes InfoCor an ideal choice to partner with.”

“With various forms of technology becoming standard in many 21<sup>st</sup> century classrooms, educators are searching for high quality products allowing them to become more mobile and accessible to the student population” says Cheryl Anderson, InfoCor’s President & CEO. “This partnership with Copernicus brings together InfoCor’s audiovisual expertise and Copernicus’ educational pioneering to classrooms, as well as meeting and training rooms in Wisconsin, Minnesota and Northern Illinois.
